## **DETAILED ACTION**

### ***Response to Arguments***

1. In response to applicant's argument that the references fail to show certain features of applicant's invention, regarding claims 1-14, it is noted that the features upon which applicant relies (i.e., "transmitting from said HLR to an access switching processor of said originating MSC ... and updated information of said subscriber"). Examiner respectfully disagrees the Sanchez's reference have disclosed transmitting from said HLR (see fig.1, elements 80, node 75, col.4, lines 59-62). Although, the ASP which is not explicitly described by Sanchez. However, MSC (mobile switching center) inherently has processor to exchange the information of telecommunication network. Therefore, previous rejection is proper.
2. This Office action is in response to amendment filed on Jul. 30, 2004, claims 1, and 3 have been amended.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting

Art Unit: 2683

directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-6, 8-9, 11-12, and 14, is rejected under 35 U.S.C. 102(e) as being anticipated by Skog et al. (6,330,445).

Regarding claims 1-3, 8-9, Skog et al. disclose a Method and system for routing of a USSD message, comprising the steps of transmitting from originating mobile switching center to a home location register a request for activation/deactivation of said additional service information (see fig.1, fig.4, elements 405, 410, 450, col.6, lines 31-53 and its description); updating said addition service by said HLR (see fig.4, element 450, col.6, lines 37-40 and its description); and transmitting from HLR to an Access Switching Processor (ASP) of said originating MSC a response message responsive to said request message, said response message includes said updated information of said subscriber (see col.4, lines 59-62 and col.6, lines 40-53 and its description).

Regarding claims 4-6, 11-12, and 14, the Examiner takes Official notice that these features are well known and inherent in mobile telephone networks.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2683

6. Claims 7, 10, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Skog et al. (6,330,445) in view of Raith (6,385,461).

Regarding claims 7, 10 and 13, Skog et al. disclose all the subject matters described above, except for authorization and de-authorization notification. However, Raith discloses a user group indication and status change in radio communications systems comprising authorization and de-authorization notification (see col.4, lines 13-25). Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the indication technique disclose by Raith in Skog to notify the user the status of connection of the device in order to improve the use of mobile systems.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
